How to create a bootable CD-ROM using Partition Wizard: 1. You will need a blank CD and a software program that can burn CDs and DVDs (Nero Burning ROM, Roxio Creator etc.). 2. Download the mini ISO file for the latest version of Partition Wizard. 3. Extract all files from the ISO file to your computer's desktop by double clicking on it. 4. Insert a blank CD into your disk drive and open up your burning software program (e.g., Nero Burning ROM). 5. Drag and drop the extracted files onto the right pane in your CD burning software program window until everything has been added, then click "Burn. 6. Once the program has finished burning the CD, please remove it from your computer's CD drive. 7. Afterwards, you should have a bootable mini ISO file on your desktop. Double click on it or burn a new CD and turn it into a bootable floppy disk then copy the ISO file to this floppy disk and save it to a safe place for future use. MiniTool Partition Wizard is available in two editions: Standard and Professional.
